Editable captions. Automatic playback.

Codex writes a timeline. PowerPoint plays the captions and exports the video.

Text remains editable in the PowerPoint file.

Codex turns slide content into a timed caption plan.

The animation is inside PowerPoint

Each subtitle is a text box with native entrance and exit effects.

Cue 1

Fade in 0.25 s | **Hold 2.00 s** | **Fade out 0.25 s**

Automatic sequence: After Previous

Next caption starts when the previous caption has finished.

A native Fade entrance makes the caption appear.

Verify the exported video

Stored timing values are only the starting point. Inspect the actual MP4.

01 Check the total duration

02 Inspect subtitle changes and disappearance

03 Keep captions clear of slide content

Check the duration of the actual exported MP4.
